SENARIO

I was a software engineer before I study Master of Software Engineering so I have some experience on software development. Although I have 3 years experience in software development, some concepts and tools mentioned in the lectures and workshops are still new to me when I was taking software project. Fortunately, I am able to figure them out sooner than other classmates because I have encountered similar problems or used similar tools. With this app, I can record how I solve problems and refresh myself when I come across the same problems someday.

CHALLENGES

- Difficult to discuss with other students because they do not have enough experience.
- Find the subject too easy

PERSONALITY

- Enthusiastic
- Positive
- Impolite

ASSESSMENTS

- Project

SKILLS AND TOOLS REQUIRED

- Agile
- Confluence
- Trello
- JavaScript

GOALS

- Understand how a project is built in the real world

Name
Janet Lane

Age

Highest Level of Education
PhD

SENARIO

All students in Introduction to Machine Learning has different background. It is difficult to decide what should be included in the lectures and workshops. With this app, experienced student can provide the knowledge what is not included in the lectures and workshops on the platform, which makes the subject more flexible.

CHALLENGES

- Not all knowledge provided in the app is correct.
- There is a chance that there are no experienced students in the class

PERSONALITY

- Patient
- Polite
- Indecisive

ASSESSMENTS

- 3 projects
- Final exam

SKILLS AND TOOLS REQUIRED

- Python
- Jupiter notebook
- Math

GOALS

- Understand how the machine learning model works

Highest Level of Education
Undergraduate

SENARIO

I am an undergraduate student. It is difficult to decide if I am taking IT Project or not. Before using this app, I can only refer to the introduction on the handbook, which is not detailed enough. Besides, I do not know what to study before the semester starts. With this app, I can know if I am familiar with the required skills or tools. Moreover, I can learn about the knowledge before the semester starts.

CHALLENGES

- Have no idea about what skills are required and what tools are used in the subject.
- Have no time to prepare before the semester starts.

PERSONALITY

- Careful
- Positive
- Over-confident

ASSESSMENTS

- Project

SKILLS AND TOOLS REQUIRED

- Programming Language
- Agile
- Confluence
- Trello

GOALS

- Understand how a project is built in the real world

MSIT

SENARIO

I am a student of MSIT. My intrests are management and programming languages. Being a moderator is really intresting for me. I am responsible for managing the posts. I need to remove inappropriate posts and approve posts, which hones my managing skills. Moreover, I read every post in this app and some of them are new to me, which makes me understand programming languages more.

CHALLENGES

- Reviewing posts is time-consuming, I do not have enough time to read every post sometime.
- I do not understand all the knowledge in posts sometime, which makes me upset.

PERSONALITY

- Enthysiastic
- Confident
- Uncareful

SKILLS AND TOOLS REQUIRED

- Basic software development skills

GOALS

- Remove inappropriate posts
